## Fitting Guide

### GBC Parkland

### GBC Estate

**Set the gate to open both ways by hanging it between the posts.  
Ensure the gate is hung in a central and square position.**

When fitting the GBC Parkland and GBC Estate leave roughly a 50mm gap between the gate and gate post.

If the gate is for pedestrian use, the catch should be fitted approximately one metre above the ground.

If the gate is for equestrian use, the catch can be fitted nearer the top of the gate so the handle just clears the gate ensuring easy reach from horseback.

When you have decided the best position for your catch, fit it to the centre of the gate post, using four M10 X 50 stainless steel coach screws.

For more information on the fitting of catches or accessories please ring 07768 748494
